Convert

Convert Blu-ray/DVD

When you are on traveling or other luxury places, you try to store certain favorite Blu-ray/DVD disc portable devices, then you should go on with Monstune for Mac to adjust Blu-ray/DVD to requirement of players or build-in the devices, and please follow the below steps:

a. Double click the program icon to start Monstune for Mac. Please click "Converter" tab, you can convert Blu-rays or DVDs to nearly any format.

b. To import Blu-ray/DVD to program, please click "Add Blu-ray/Add DVD" independently according to the types you own.

c. Select your output format in the right box. All formats are grouped into 7 categories and all devices are grouped into 9 categories. Find your desired output format or device. By choosing an audio format, you extract only the audio track from the video, or convert audio files from one format to another.

d. You can also click "Settings" to change the format parameter like code, resolution, bitrate, etc. of output files. And appoint the output storing route by clicking the "..." at the bottom box of "Open Folder". Or you could skip this step to leave it default.

e. After the settings are completed, simply click the "Start" button of task and the program will complete soon. You'll see the status changed below the item bar. When done, open the converted files by clicking "Open" or "Open Folder" at the downright box.
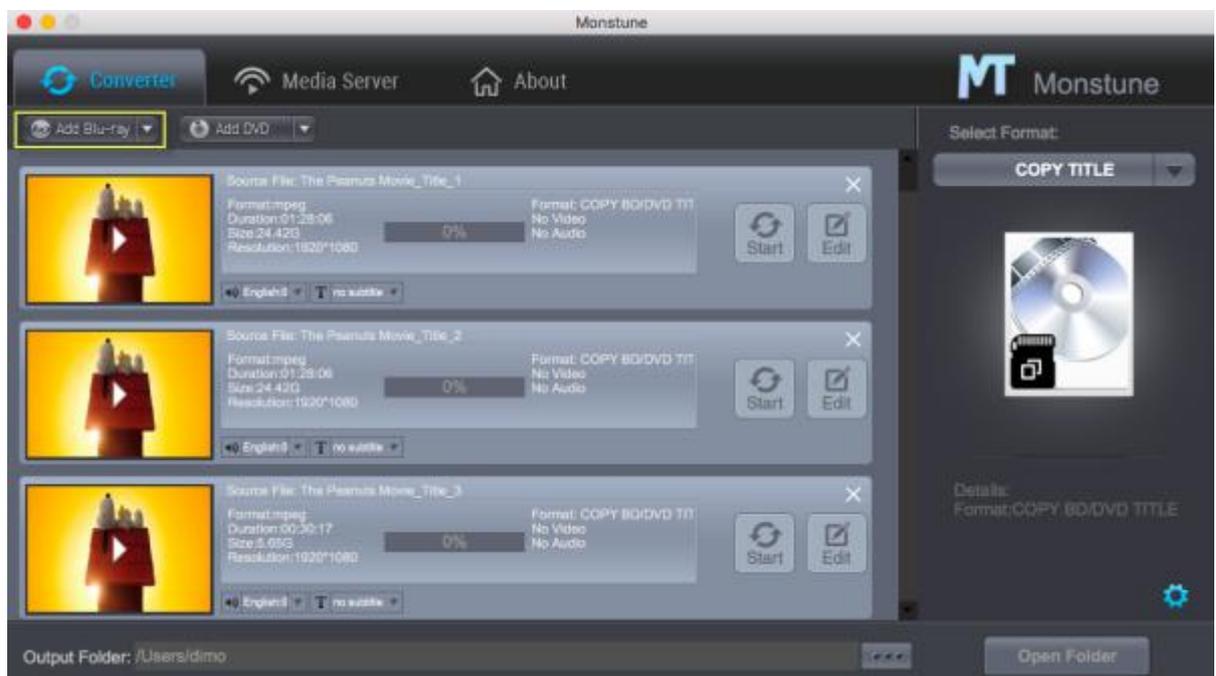

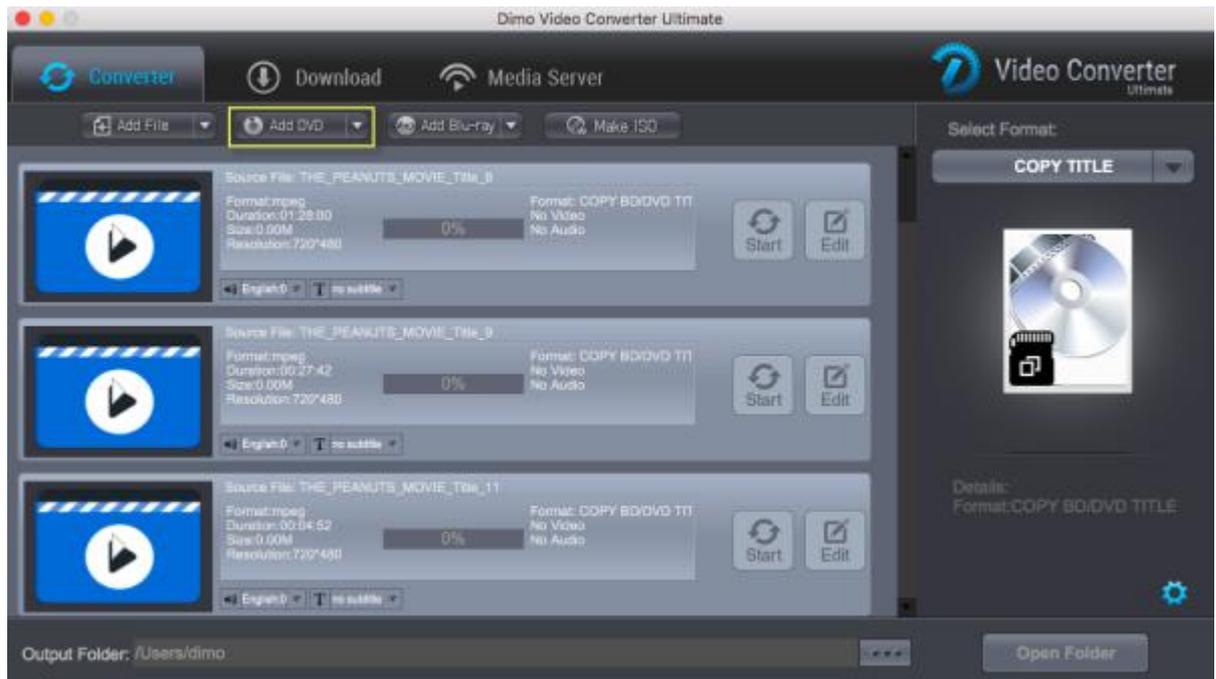

Copy Blu-ray/DVD Title

Step 1. Double click the program icon to start Monstune for Mac. Please click "Converter" tab, To import Blu-ray/DVD disc, folder or ISO

to program, please click "Add Blu-ray" or "Add DVD", choose the disc name and confirm, or use virtual drive tool to add ISO files.

Step 2. Select "COPY TITLE" from "Format > Video" in the right box.

Step 3. Appoint the output storing route by clicking the "..." at the bottom box. Or you could skip this step to leave it default.

Step 4. After the settings are completed, simply click the "Start" button and the program will complete soon. You'll see the status changed below the item bar. When done, open the converted files by clicking "Open" or "Open Output Folder" at the downright box.

Backup Blu-ray/DVD to Folder

By choosing "Add Blu-ray > Copy Bluray Disc to Folder" or "Add DVD > Copy DVD Disc to Folder" , selecting your disc name, confirm and then click "Start", you are ale to 1:1 backup Blu-ray to BDMV folder or copy DVD to Video_ts folder with original audio tracks, subtitles, etc being kept.
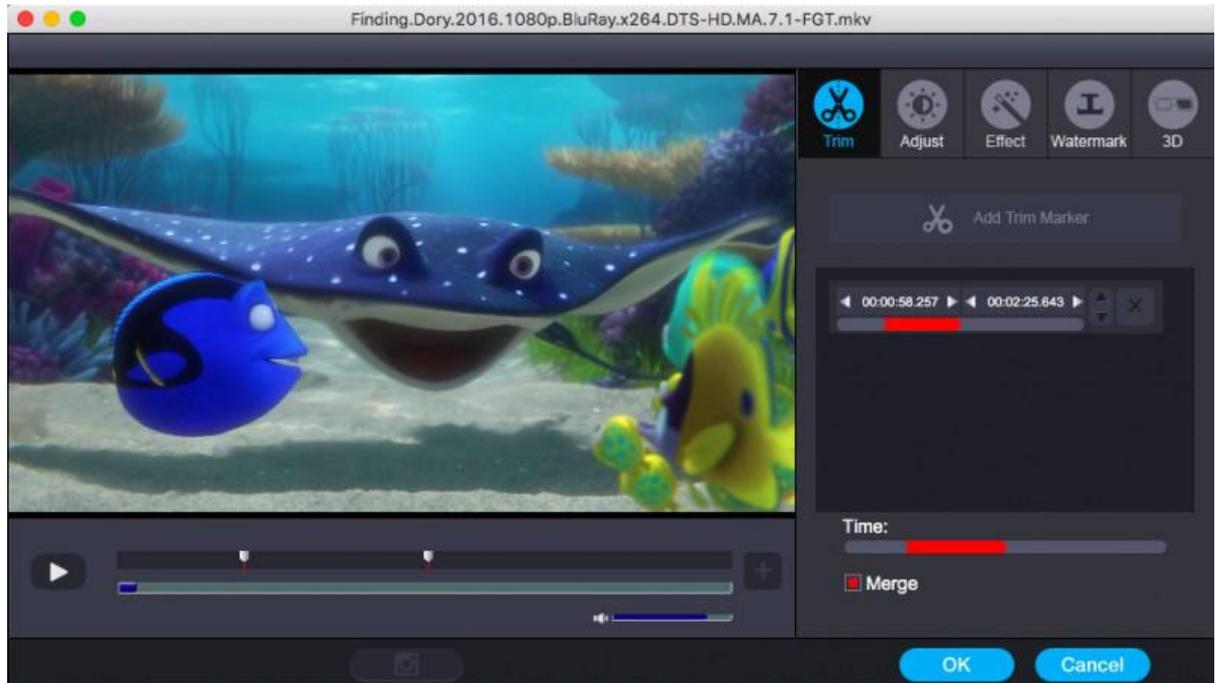

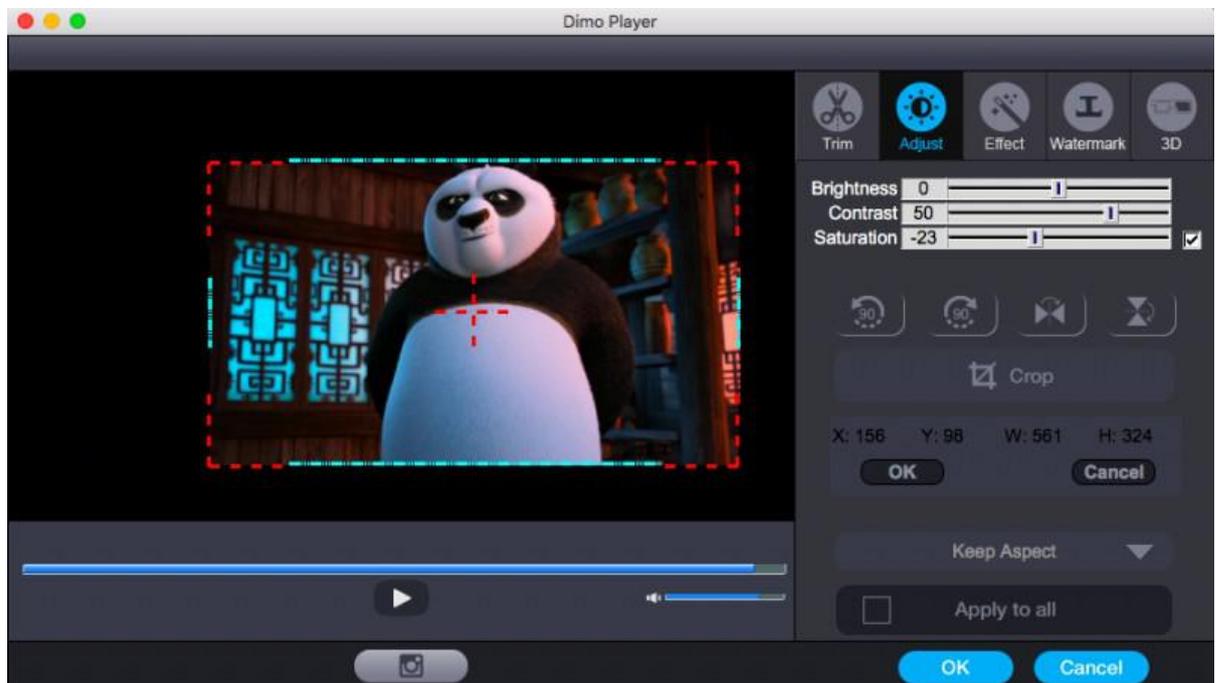

Edit

Edit Blu-ray/DVD Video

Monstune for Mac provides you with all regular video editing tools so you can enhance and individualize your video before conversion.

Open Video Editing Window: Click the "Edit" icon of the video item bar and a video editing window will show up as below. Thus you can trim, flip, add effects and watermark with ease.

a. Trim Video: Go to Edit > Trim to open the editing windows. Click the Play button to preview your video and at the position you want to trim. Drag the markers to adjust segment duration. Then click "Add Trim Maker".
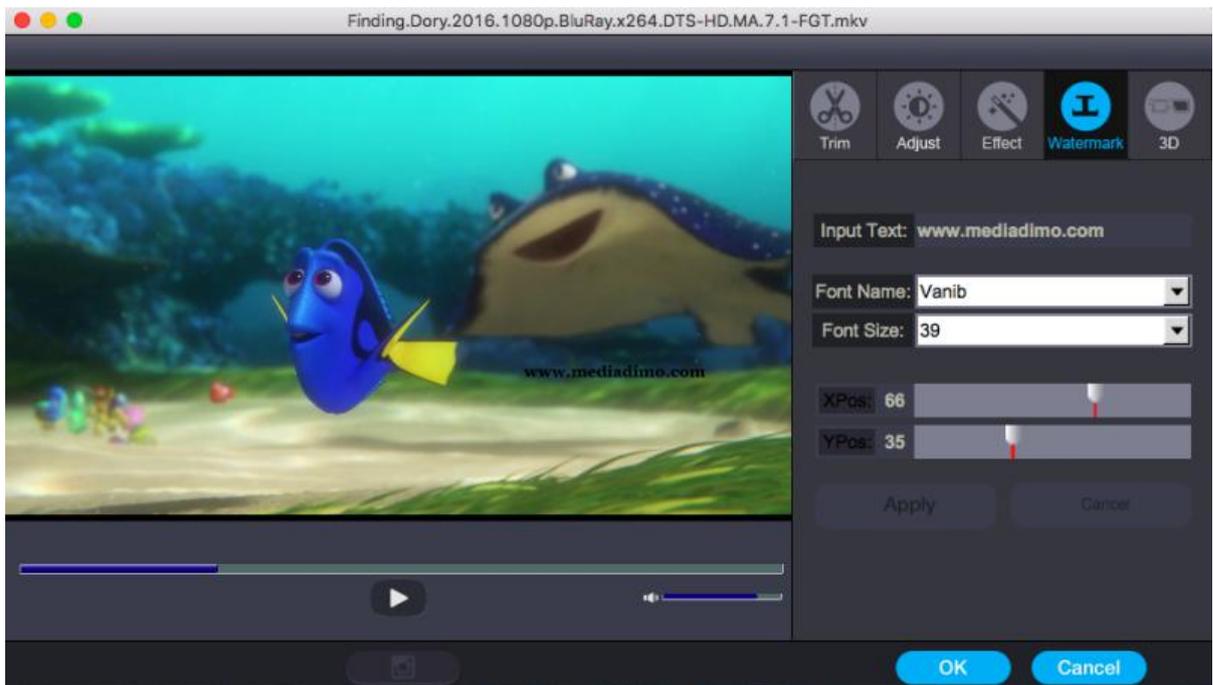

b. Crop Video: As you can see in the above window, there are 4 rotating buttons in a row. Click each to rotate or flip video instantly. Or click crop to adjust frame size in desired aspect ratio to fit your devices. Or adjust Contrast, Saturation, Brightness, etc. by checking the box to activate and directly drag the progress bar to get the effect you need. And you are able to preview the original and modified video in the preview area in real time. Tick "Apply to all" to apply the settings to all Blu-ray/DVD titles.

c. Apply Effects: Go to Effect tab to choose from 32 effect to tune up your video. Simply click an effect to apply.

d. Add Text Watermark: You can add watermark in the text tab, where you can write an external character watermark to put on the video.

e. Add 3D Effect: As you see the "3D" tap, you could add "Red-Blue", "Top Bottom", or "Left-Right" to create 3D effect.
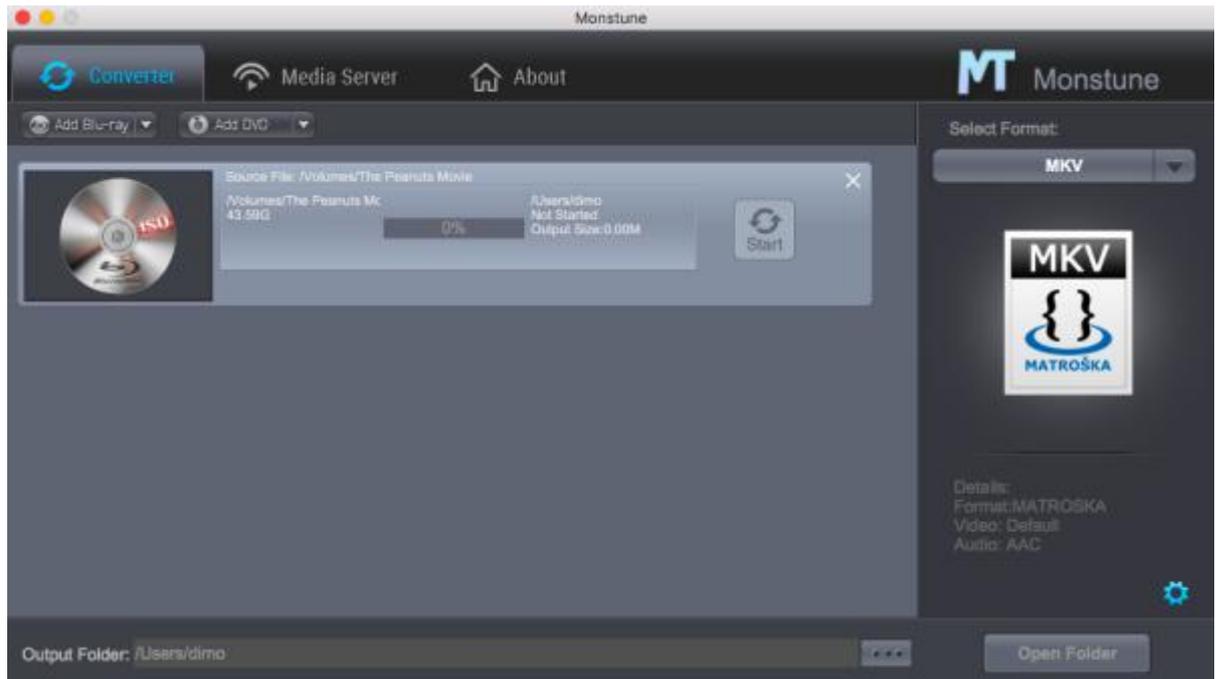

Burn
