As an online video downloader, Dimo MP4 Video Converter is able to fast download YouTube videos and other videos from 300+ online video sites like Vimeo, BBC, Facebook, Google video, Myspace, etc.

Step 1. Locate online videos

Open the "Download" tab, to import online videos, copy and paste video URL in the address box.

Step 2. Set output folder

Set output folder by clicking "...".

Step 3. Start video downloading

Click "+" to add this video to the downloading queue. Batch video downloading are also supported; After downloading, click "Open" to locate the downloaded MP4 videos for sharing on iPhone, iPad, Android, etc. wirelessly with free media server.

Convert

Convert Video to MP4

First, download this Video to MP4 converter from Dimo, then follow the guide below to accomplish your task.

Step 1: Import video files into the Converter

Click on "Add File" icon on the top bar of the software to pop out a drop-down box to browse and choose video for importing.

Alternatively, you can directly drag and drop video files into the program. Also, you could play back loaded media files, take screenshot, edit loaded video files via the internal video editor, etc.

Step 2: Choose Output Format

After importing source files, open the right drop-down box to enter the "Profile" panel, where you could select a proper profile as output format. You could select from "Format", "Device", "Editor", "4K Video", "TV", "Games" and "VR" groups or make use of the profile search bar to search desired profile quickly.

Step 3: Set Video and Audio Parameters

By clicking "Settings" button, you could enter the "Profile Settings" interface to adjust video and audio parameters of selected output profile, including: Video Codec, Quality, Video Size, Bit Rate, Frame Rate, Aspect Ratio as well as Audio Codec, Quality, Bit Rate, Sample Rate, Channels, etc. After setting completes, click "OK" button to save what you set..

Step 4: Set Output Directory

After returning to the main interface, click on "..." to pop up a sidebar where you are required to set a directory for containing output video/audio files in the "Save to" box..

Step 5: Start to Convert Video Files to MP4

Click the "Start" button to start converting video files to MP4. Batch conversion is available. After finishing conversion process, you can find all converted files from the output directory you set in Step 4.

Burn

Make ISO

Dimo MP4 Video Converter allows the users to make ISO from the video folder directly. Please follow the steps below to create ISO using Dimo MP4 Video Converter:

Step 1: Launch Dimo MP4 Video Converter and add files

Launch Dimo MP4 Video Converter and click "Make ISO" to locate your source video folder.

Step 2: Start making ISO

Click on the "Start" button to start the video folder to ISO converting process. It will take a few minutes to complete the process.

Play

Play Video

Dimo MP4 Video Converter can enable you to play any video files stored on your computer no matter what video format and codec the video is. Please follow the steps below to play videos through Dimo MP4 Video Converter:

Step 1: Launch Dimo MP4 Video Converter

Download and install Dimo MP4 Video Converter. Then launch Dimo MP4 Video Converter by double clicking the installation file.

Step 2: Choose the "Converter" tab

When you launch the Dimo MP4 Video Converter, the "Converter" tab is already selected by default. However if any other tab is selected, you should switch to the "Converter" tab.

Step 3: Load Source Video

Now, you can import the source video to Dimo MP4 Video Converter. You can load the video file by dragging it into the interface. Or you can click on "Add File" button and open the file explorer. Then you can select the desired video file from the explorer quickly.

Step 4: Start to Play Video

After you loaded the video into Dimo MP4 Video Converter, you can see the movie list on the interface. Move the mouse on the video file you want to play and double click it, a media player will pop up and you can play your video now.

Edit

Step 1: Launch Dimo MP4 Video Converter.

First install and launch Dimo MP4 Video Converter on your computer.

Step 2: Import source file to the program. It is pretty easily to load files with Dimo MP4 Video Converter, you can directly drag and drop the files to the program or use the "Add File" button to load source file.

Step 3: Click the "Edit" option to open "Video Editor" window.

After importing source video file, click the "Edit" icon on the processing panel, and you will be guided into a real-time video previewing window where you can edit and customize video for output.

Trim video length

Trim video to get desired parts.

Under "Trim" section, you can directly drag the slide bar to trim video length, or manually input values in "Start Time" and "End Time" box.

The clip length can be viewed instantly. Reset it or click "OK" to confirm it.

If you need to trim multiple segments, choose another trim start time and end time, then use "Add Trim Marker" button again. You can modify the start time and the end time according. However if any point of time, you are not happy with the trimming, you can use the delete button and set the trimming start point again. If you like to put these trimming segments in right order, click "Up" or "Down" button to do adjustment. To add this multiple trimming segments into one file, check "Merge" option, otherwise you will get splitted trimming files.

Crop video size

Under "Adjust" section, directly drag the dot frame to crop video, or select "Keep aspect", "Fullscreen", "16:9" or "4:3" to get your desired video size. The above four icon are used for flipping the video in various angles and rotate your source files. You can check to activate to adjusting Contrast, Saturation, Brightness, etc and directly drag the progress bar to get the effect you need. And you can preview the original and modified video in the preview area in real time. Press "OK" to confirm it. Check "Apply to all" to apply the settings to any of your loaded files.

Adjust video effect

Go to "Effect" section to choose from 32 effect for special video effect. Press "OK" to confirm it. The "Deinterlacing" option allows you to convert 1080i video files in MTS, MXF, etc. in interlaced format into a non-interlaced form.

Add text watermark

Switch to "Watermark" section to add a textual watermark. Just tap the text what you want to add into the video in the right place. Then click "Apply" and you can choose font size and and adjust the horizontal and vertical position of the text watermark. After all the settings, click "OK".

Apply 3D Effect

On the video editing panel, open the "3D" tab and then choose a 3D effect to apply to the final video file. There are in total 6 different 3D movie effects available for you to choose from: Red/Blue, Top-bottom, and Side by Side (Left-right). Select one according to the 3D glasses you are using to enjoy 3D videos and movies.

Step 5: Define output file format.

On the main interface, click "Select Format" section on the right panel, in the pop out window, select your desired output format for the trimmed video.

Step 6: Choose output folder.

Specify a destination folder on your computer to save the trimmed videos. You can also choose to skip this step if you want to save the generated file in the default location.

Step 7: Start the conversion process.

Click on the "Start" button to start the video to MP4 conversion process, it will take a few minutes (depending on file size) for the conversion to complete.

Cast

Cast Video to Devices/TVs

Dimo MP4 Video Converter has a outstanding advantage. That is you can cast the converted video to your iPhone, iPad, Android Tablet/Phone, TV by the "Media Server" feature offered by Dimo MP4 Video Converter.

Step 1: Keep your device and PC in same network

Firstly, you need to keep your portable devices and the PC running the software on in the same network.

Step 2: Open Dimo MP4 Video Converter

The second step is to launch Dimo MP4 Video Converter.

Step 3: Choose "Media Server" and locate source files

Click on "Media Server" icon at the top of the interface and choose the source video folder to locate by pressing "Browse...". Then click "Share". Your IP and Port will be detected automatically, and you will get a QR code.

Step 4: Scan the resulted QR code for sharing

Use your iPhone, iPad, Android phone/tablet to scan the QR code then you can play the video directly without needing to transfer the media to devices via USB. For TV users, you even can write `http://IP:PORT` like "`http://192.168.1.109:8868/`" (without quotation marks) to the address bar of your browser for sharing your media files.

The loaded video source will be listed and you can now play local files or converted movies on mobile devices or TV.
