## Download

### Download online movies

Dimo Video Downloader for Mac is a very easy-to-handle Mac video downloader, which can add direct links to download online 4K UHD/HD/SD videos for any popular portable device. It can help you download videos directly from YouTube, Vimeo, Metacafe, Facebook, DailyMotion, Vevo and Yahoo and other known video-sharing websites.

a. Search for your favorite video/movies/films from YouTube, Dailymotion, Vimeo and other 300 online video sites. Copy its URL by "Command + C". Then Launch the online video downloader, turn to "Download" tab, and "Command + V" to paste the URL to the address bar of the downloader.

b. After you added URL, Click "+". When it is downloaded, just click "Open", then you can see the video.

## Mirror

### Mirror locate files

If you want to share downloaded video files from Mac to portable devices, then please go for Video Downloader for Mac and turn to the "Media Server". Here is a small step by step guide that will guide you through the process of mirroring:

a. Keep your iPhone/iPad/Android device/TV and Mac in the same network

b. Click "Browse..." to locate the source video folder

c. Press "Share" and use your device to scan the upcoming QR code or write `http://IP:PORT` like "`http://192.168.1.109:8868/`" (without quotation marks) into the address bar of the browser.

d. Now you can view the source files wirelessly on your devices if they are supported by browser.
