Download

Download Online Video

Dimo Video Downloader offers you an easy way to download video/audio files from online websites and save them to the formats supported by your devices like MP4 or MP3. Here we use this top Video Downloader, which can download videos not only from YouTube but also other popular video sharing websites such as Vimeo, Metacafe, Facebook, DailyMotion, Vevo, and Yahoo and so on.

Step 1. Locate online videos

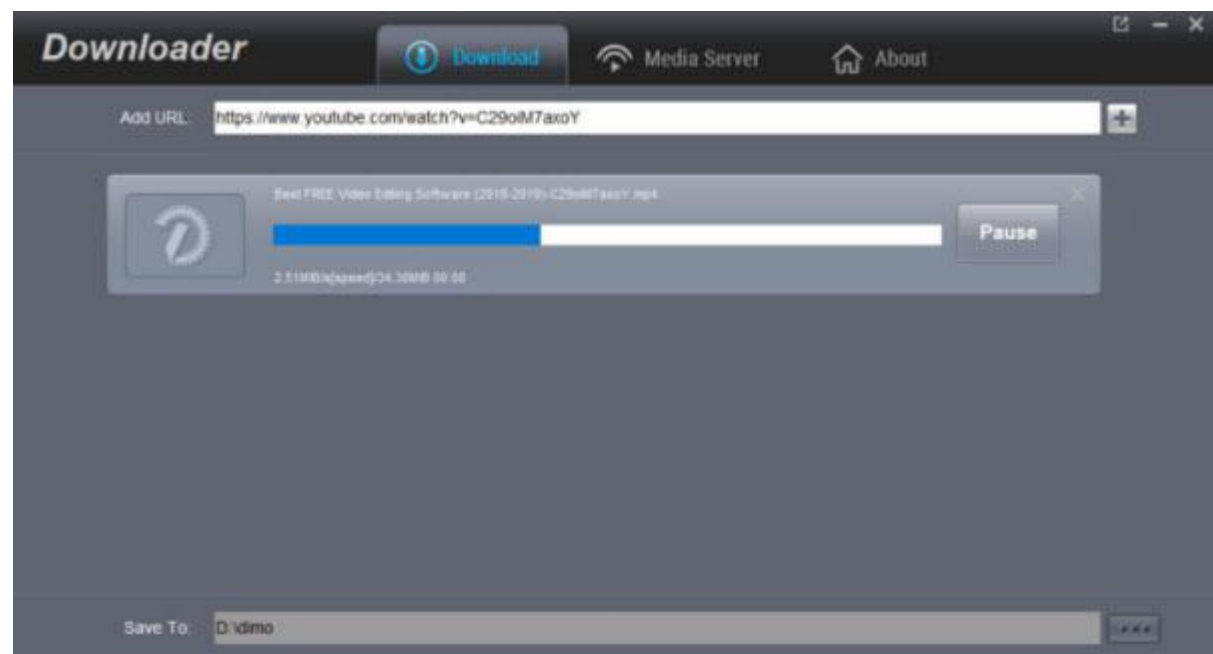

Open the "Download" tab, to import online videos, copy and paste video URL in the address box.

Step 2. Set output folder

Set output folder by clicking "...".

Step 3. Start video downloading

Click "+" to add this video to the downloading queue. Batch video/audio downloading are also supported.

Once finished, click "Open" to locate the downloaded videos for sharing on iPhone, iPad, Android, etc. wirelessly with free media server.

Cast

Cast Video to Devices/TVs

Dimo Video Downloader has an outstanding advantage. That is you can cast the downloaded video to your iPhone, iPad, Android Tablet/Phone, TV by the "Media Server" feature offered by Dimo Video Downloader.

Step 1: Keep your device and PC in same network

Firstly, you need to keep your portable devices and the PC running the software on in the same network.

Step 2: Open Dimo Video Downloader

The second step is to launch Dimo Video Downloader.

Step 3: Choose "Media Server" and locate source files

Click on "Media Server" icon at the top of the interface and choose the source video folder to locate by pressing "Browse". Then hit "Share". Your IP and Port will be detected automatically, and you will get a QR code.

Step 4: Scan the resulted QR code for sharing

Use your iPhone, iPad, Android phone/tablet to scan the QR code then you can play the video directly without needing to transfer the media to devices via USB. For TV users, you even can write `http://IP:PORT` like "`http://192.168.1.109:8868/`" (without quotation marks) to the address bar of your browser for sharing your media files.

The loaded video source will be listed and you can now play downloaded movies on mobile devices or TV.
